9.4 Storage Plan Variations for Different Lab Facilities

Below are illustrations of possible chemical storage arrangements for two types of lab facilities. They are provided merely as examples of arrangements that satisfy the requirements of the chemical storage plan. They are not intended to restrict storage to the particular arrangements and facilities depicted. Refer to Section 9.3, Storage Group Definitions, for segregation and facility requirements.

Figure III.3: Variation 1: Chemical Storage Plan for Lab with Freestanding Acid Cabinet
